

Skyline Policy on Airborne Diseases

Skyline wants to be proactive for prevention.

Canine influenza and **Kennel Cough** are airborne diseases. Please stay home if you suspect either with your dogs and keep home other dogs of your family, for they can be carriers. If the instructors suspect either, you will be asked to leave.

Canine Influenza: there is a 4-week quarantine period and you can receive class credit if you have a veterinarian's note.

Kennel Cough: you will need to keep your dog home for 3 weeks and if a second dog then 4 weeks for quarantine. You can receive class credit if you have a veterinarian's note.

Skyline Agility recommends that you bring your own crate for use during classes. If you use any club crates, disinfect before and after using and bring your own bedding.
